

MEMBUAT PAKET HOSTING RESELLER

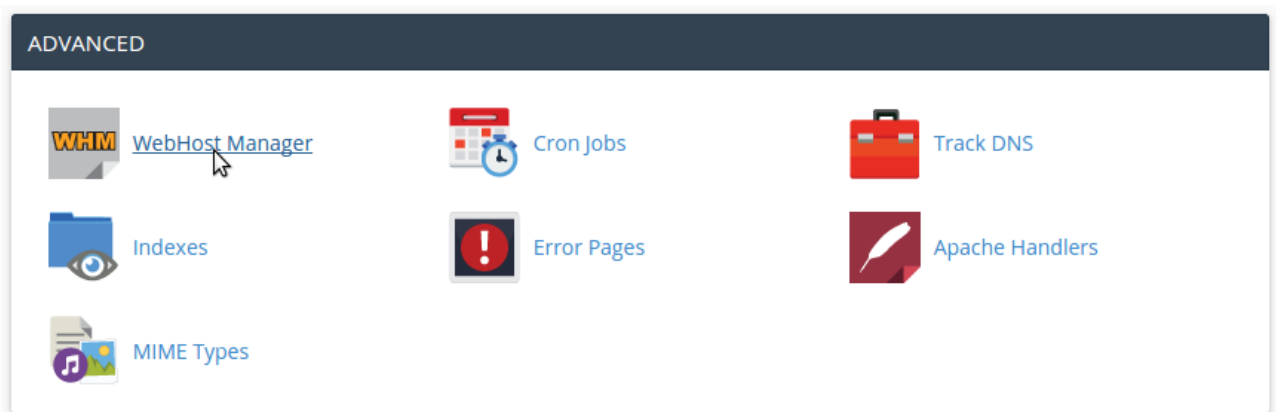

Jika anda sudah membeli hosting reseller dan ingin membuat akun hosting baru, hal pertama yang harus anda lakukan adalah membuat paket hosting reseller. Paket hosting ini berisi spesifikasi paket hosting yang ingin anda jual kembali sebagai reseller.

Sebagai contoh, kita akan membuat paket hosting bernama : “Pemula” dengan spesifikasi sebagai berikut :

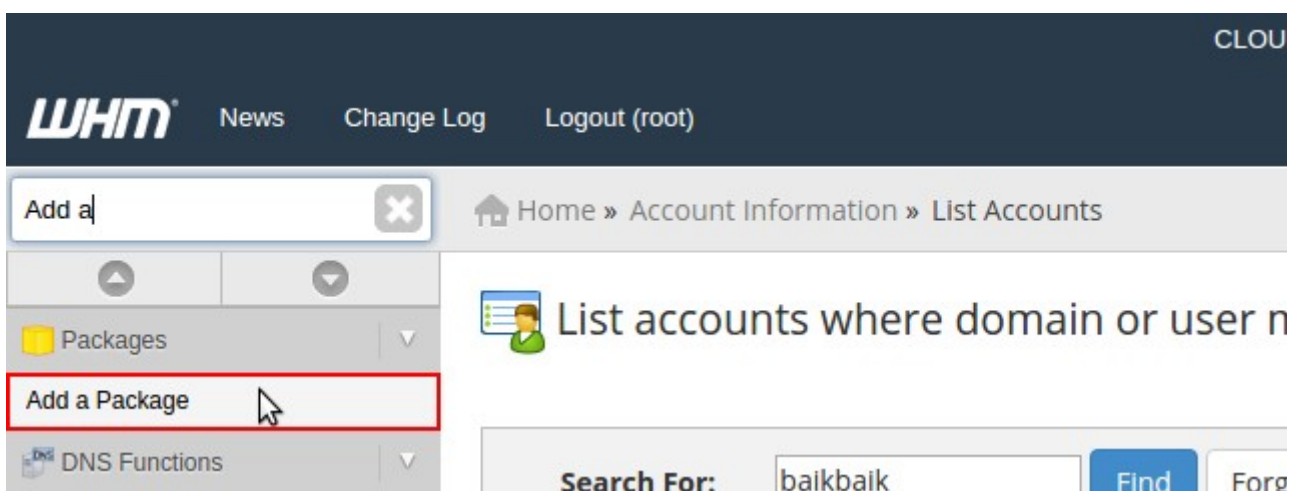

1. Space 250 MB
2. Bandwith Bulanan 2 GB
3. FTP Account : 5
4. Email Account : 15
5. Email Lists : 5
6. Databases : 5
7. Sub Domain : 5
8. Parked domain : 0
9. Addon domain : 0

Langkah-langkahnya adalah sebagai berikut :

1. Masuk ke menu **Advanced > WHM Webhost Manager** dari cPanel Reseller anda

2. Setelah masuk WHM, cari menu **Add a Package**.

3. Isikan spesifikasi paket hosting yang ingin anda buat. Pada bagian **Maximum Hourly Email by Domain Relayed**, dan pada bagian **Maximum percentage of failed or deferred messages a domain may send per hour**, biarkan default (unlimited). Setting pada kedua bagian tersebut ikut setting default dari server.

Package Name	<input type="text" value="Pemula"/>
---------------------	-------------------------------------

Resources	
Disk Quota (MB)	<input checked="" type="radio"/> <input type="text" value="250"/> <input type="radio"/> Unlimited
Monthly Bandwidth (MB)	<input checked="" type="radio"/> <input type="text" value="2000"/> <input type="radio"/> Unlimited
Max FTP Accounts	<input checked="" type="radio"/> <input type="text" value="5"/> <input type="radio"/> Unlimited
Max Email Accounts	<input checked="" type="radio"/> <input type="text" value="15"/> <input type="radio"/> Unlimited
Max Email Lists	<input checked="" type="radio"/> <input type="text" value="5"/> <input type="radio"/> Unlimited
Max Databases	<input checked="" type="radio"/> <input type="text" value="5"/> <input type="radio"/> Unlimited
Max Sub Domains	<input checked="" type="radio"/> <input type="text" value="5"/> <input type="radio"/> Unlimited
Max Parked Domains	<input checked="" type="radio"/> <input type="text" value="0"/> <input type="radio"/> Unlimited
Max Addon Domains	<input checked="" type="radio"/> <input type="text" value="0"/> <input type="radio"/> Unlimited
Maximum Hourly Email by Domain Relayed	<input type="radio"/> <input type="text" value="0"/> <input checked="" type="radio"/> Unlimited
Maximum percentage of failed or deferred messages a domain may send per hour	<input type="radio"/> <input type="text" value="0"/> <input checked="" type="radio"/> Unlimited

4. Pada bagian **Settings**, biarkan default/tidak perlu dirubah. Terakhir, klik **Add**.

The image shows a screenshot of the cPanel 'Settings' form for a new user account. The form is contained within a light gray border. At the top left of the form is the title 'Settings'. Below it is the 'Options' section, which contains four checkboxes: 'Dedicated IP', 'Shell Access', 'CGI Access' (which is checked), and 'Digest Authentication at account creation.'. Below the options section are three dropdown menus: 'cPanel Theme' set to 'paper_lantern', 'Feature List' set to 'default', and 'Locale' set to 'English'. At the bottom left of the form is a blue button labeled 'Add' with a mouse cursor pointing to it.

Settings	
Options	<input type="checkbox"/> Dedicated IP
	<input type="checkbox"/> Shell Access
	<input checked="" type="checkbox"/> CGI Access
	<input type="checkbox"/> Digest Authentication at account creation.
